

Lavender Chocolate Chip Cookies

Recipe Instructions

Mixing and Baking Your HomeMade Cookies

Mixing In The Other Ingredients

Mixing and Cooking

The key to making fabulous cookies is to use a mini ice cream or melon scoop to make perfectly round and uniform size cookies. Then, don't over cook if you like chewy ones.

Preheat the oven to 375°

1 Cup Butter at room temperature

2 Large Eggs

With a food processor or mixer, cream eggs and room temperature butter until very loose and fluffy

Mix wet and dry ingredients thoroughly.

Baking

You can make the cookies the size you want, putting the batter onto the sheet from a spoon. Allow room for the cookies to spread out.

Bake for 8 to 10 minutes until the edges start to brown and the middle springs back when touched. Let sit on cookie sheet once out of the oven for a couple of minutes and then put cookies onto a rack to cool.
